Abstract

Contents

Introduction

Introduction to your project.

Chapter 1

Background and data

1.1   Why MCMC algorithms

1.2   Challenges of running MCMC

1.3   Optimal thinning as a solution to burn-in and thinning

1.4   Gradient calculation in optimal thinning

Chapter 2

Methodology

One or more chapters describing the novel methodology you have developed
or implemented or the strategy for model comparisons and assessment.

Chapter 3

Results

The results of your analysis.

Chapter 4

Conclusions

What the reader has learnt from your dissertation and what questions are still open.

Appendix A

Code

Here you can include relevant bits of the code.
